Improve Quality & Performance!

Performa[™] is the premier on-demand quality and performance improvement application for the healthcare industry. *Performa* enables healthcare organizations to rapidly and cost-effectively design, build, and launch comprehensive online quality improvement (QI) and performance improvement (PI) initiatives for healthcare professionals.

Performa is web-based and is offered as a hosted application that can be fully branded to match your organization's look and feel.

Performa is a turn-key solution that includes an easy-to-use, step-by-step interface for the healthcare professional and online content management and real-time reporting systems for the administrator. Developing QI / PI initiatives with *Performa* is exciting and places control in the hands of the content experts, without the need for computer programmers!

Performa was specifically designed to bring a *Six Sigma*[™] methodology to healthcare quality improvement. *Six Sigma* is recognized as the global standard of quality improvement practice, and now through *Performa*, healthcare organizations can deliver consistent QI / PI initiatives to achieve breakthrough advancements in professional practice and patient care.
